LOC 3 – uses the acquired knowledge to identify and explain the features of the relationship between language, culture and consciousness and the processes of intercultural communication in the process of philological education;

LOC 4 – has a high level of development of professional thinking, the ability to use the conceptual apparatus of teaching and educational methods in scientific research;

LOC 5 – applies methods and techniques for the formation of linguistic competence, linguodidactic competence, system, methodology and technology of educational and educational activities at the university.

Post requisites: no.

Optional component 2

Course: Constants in the study of the history of modern Russian literature

Intensity of the Course: 5 academic credits

Module Code: LMA – 2

Module Name: Linguistic and methodological aspects

Prerequisites: Russian literature in the context of world culture

Purpose: consideration of the methodology of modern literary criticism and world Slavic studies of the 19th – early 21st centuries.

Short Description: the most important facts, the content of key studies, patterns of development of literary science related to this era. History and current state of the chosen professional field, problems of one's own scientific research, requirements for the presentation of the results of scientific research in the field of philology.

Learning Outcomes in EP (LOP):

LOP 1 – Masters the methods of communicative analysis and methods of semantic analysis of text that contribute to the accurate perception of the original statement, including searching for information in reference books, specialized literature and computer networks.

LOP 6 – Masters modern methods in organizing independent research, formatting them into scientific texts, analyzes problems associated with methods for assessing the effectiveness of scientific activity both in Kazakhstan and abroad, paying special attention to scientometric methods; conducts comparative analyzes of visualization tools for scientometric indicators of an organization, developed by Elsevier and Thomson Reuters and uses them in its research; applies a system of international patenting of the results of intellectual activity of scientists.

LOP 7 – Uses global knowledge bases to search, study the necessary literature, research problems and publish their works, as well as use these resources for bibliographic review in the preparation of scientific articles.

LOP 8 – Able to effectively communicate ideas and information in at least two languages, work in a team, demonstrate leadership skills, create an inclusive environment where everyone feels accepted and respected, and contribute to the development of collective potential.

Learning Outcomes in Course (LOC):

LOC 1 – knowledge of the history and current state of the chosen professional field, the problems of one's own scientific research, requirements for the presentation of the results of scientific research in the field of philology;

LOC 2 – knowledge of the concept of historical and literary development; the foundations of periodization of the history of world literature, the characteristics of each historical stage in the development of national literature of different countries in connection with social, ideological and aesthetic concepts;

LOC 3 – readiness to independently collect and process scientific information, skills of logical analysis, various kinds of reasoning and professional argumentation in the field of philology and literary disciplines;

LOC 4 – ability to use the basic concepts of literary criticism; apply methods of historical poetics when solving philological problems; independently replenish theoretical and practical knowledge in the field of historical poetics;

LOC 5 – the use of inductive and deductive methods of organizing an argumentation system when studying the patterns of development of literature, analytical and synthetic forms in the process of interpreting a literary text;

Post requisites: no.

Optional component 3

Course: Modern technologies of professionally-oriented education

Intensity of the Course: 5 academic credits

Module Code: LMA – 2

Module Name: Linguistic and methodological aspects

Prerequisites: Methods of teaching Russian language and literature

Purpose: creating conditions for the development of professional competence in the field of teaching by mastering systemic knowledge about educational technologies at a university.

Short Description: familiarization with the history of the development of pedagogical technologies in the education system; formation of systemic knowledge about the pedagogical process and pedagogical technologies; formation of professional skills in designing the pedagogical process at a university; formation of positive motivation for teaching activities; development of students' ability to systematically analyze pedagogical phenomena and processes.

Learning Outcomes in EP (LOP):

LOP 1 – Masters the methods of communicative analysis and methods of semantic analysis of text that contribute to the accurate perception of the original statement, including searching for information in reference books, specialized literature and computer networks.

LOP 2 – Synthesizes knowledge in the field of active processes of linguistics and literary criticism and interdisciplinary knowledge to solve research and practical problems, linguistic facts of historical and modern Russian studies;

LOP 4 – Demonstrates one's own positions on the problems of pedagogy and education, activates students' independent work with modern sources of scientific and pedagogical literature; develops professional communication skills, defending one's pedagogical position

LOP 5 – Uses modern scientific methods in organizing independent scientific research and preparing them in scientific texts.

LOP 10 – Demonstrate knowledge of and compliance with ethical and legal standards in research and use of digital technologies. Apply security measures when working with digital information and data protection, promote the active, safe and ethical use of digital resources.

Learning Outcomes in Course (LOC):

LOC 1 – uses the terminological and methodological apparatus of the discipline to solve scientific and professional problems of any level of complexity;

LOC 2 – knows how to communicate in the scientific field;

LOC 3 – demonstrates the choice of priorities for educational and research activities, correlates one's own interests with social and ethical values;

LOC 4 – knows how to work in a team, convince, argue, draw conclusions; ability to communicate in formal and informal settings;

LOC 5 – summarizes and systematizes scientific information in the context of general humanitarian knowledge; critically comprehends and uses knowledge in practice;

LOC 6 – applies the acquired knowledge in his own research activities.

Post requisites: no.

Optional component 4

Course: National textual tradition, literary practice of the twentieth century and modern humanitarian thought

Intensity of the Course: 5 academic credits

Module Code: LMA – 2

Module Name: Linguistic and methodological aspects

Prerequisites: Eternal images of world literature

Purpose: developing the ability to describe and evaluate the main types of philological research methods.

Short Description: The ability to generate new ideas when solving research and practical problems that can be operationalized based on available resources and limitations, knowledge of the history and current state of the chosen professional field, the problems of one's own scientific research, requirements for the presentation of the results of scientific research in the field of philology. Knowledge of the main achievements and methodology of Russian textual criticism, various principles of preparing literary texts for publication, establishing the status of the source of a literary text, attribution and dating of texts, and their scientific commentary.

Learning Outcomes in EP (LOP):

LOP 1 – Masters the methods of communicative analysis and methods of semantic analysis of text that contribute to the accurate perception of the original statement, including searching for information in reference books, specialized literature and computer networks.

LOP 2 – Synthesizes knowledge in the field of active processes of linguistics and literary criticism and interdisciplinary knowledge to solve research and practical problems, linguistic facts of historical and modern Russian studies;

LOP 5 – Uses modern scientific methods in organizing independent scientific research and preparing them in scientific texts.

LOP 6 – Masters modern methods in organizing independent research, formatting them into scientific texts, analyzes problems associated with methods for assessing the effectiveness of scientific activity both in Kazakhstan and abroad, paying special attention to scientometric methods; conducts comparative analyzes of visualization tools for scientometric indicators of an organization, developed by Elsevier and Thomson Reuters and uses them in its research; applies a system of international patenting of the results of intellectual activity of scientists.

Learning Outcomes in Course (LOC):

LOC 1 – knowledge of the basics of periodization of the history of world literature, the features of each historical stage in the development of national literature;

LOC 2 – readiness to independently collect and process scientific information, skills of logical analysis, various kinds of reasoning and professional argumentation;

LOC 3 - the use of inductive and deductive methods of organizing an argumentation system when studying the patterns of development of literature, analytical and synthetic forms in the process of interpreting a literary text;

LOC 4 - ability to use theoretical knowledge in professional activities;

Post requisites: no.
