2.1. DESCRIPTION MODULES AND DISCIPLINES

MSP- 1 Organization of research work <i>Module description:</i>							
№	Name of subject and code	Cycle/component	Credits	Subject discription	Teaching methods	LO by EP	Assessment methods
1	ORW 701 Academic writing	UC	4	<p>Academic writing (intensive course) is aimed at developing the skills of writing various scientific texts (scientific article, report, reviews, literary review, article based on empirical data, etc.), comprehensive mastery of their features and structures.</p> <p>The course covers all the problems that a doctoral student faces in the process of writing an article, starting with the choice of a topic and ending with its publication.</p> <p>In the course of studying the discipline, doctoral students improve such skills as critical thinking, systematization of writing, scientific discourse, critical reading, analysis, evaluation, etc. They get acquainted with the structure and styles of scientific articles in highly rated journals of international level.</p>	Bloom's Taxonomy	OP 2 OP 7 OP 8	Written
2	ORW 702 Methods of scientific research	UC	5	<p>Methods of scientific research (intensive course) – in the course of studying the discipline, a doctoral student, using the experience and knowledge accumulated up to this period, depending on his field of study, will be able to develop and draw up a research plan that he considers acceptable, as well as the possibility of choosing a dissertation topic, how to approach the choice of domestic and foreign scientific supervisors.</p> <p>In addition, sufficient information will be given about the types of research contained in the design of the research paper. Thus, the doctoral student will be given the opportunity to systematize the writing of a research paper and get acquainted with other methods of scientific research.</p>	Discussion, dialogue	OP 2 OP 4 OP 5 OP 7 OP 8	Written

				Knowledge about the application of quantitative, qualitative, mixed research methods, methods of data collection, research ethics, information necessary for the research process, such as data analysis, will be improved.			
MSP- 2 Methodology and scientific priorities of philology <i>Module description:</i>							
3	MSP 703/1 A. New directions in grammar	OC	5	The purpose of the discipline is the formation of a basic professional competences in the field of communicative grammar of the Kazakh language as the most important direction of studying the modern Kazakh language, He studies the specifics of Kazakh grammar in the unity of structural-systemic and functional approaches; main sections of functional communicative grammar; linguistic analysis methods used to implement scientific research, language analysis and interpretation algorithm of facts in	Semantic map, cluster	OP 1 OP 3 OP 5 OP 6	Written
	MSP 703/2 B. New trends and directions of literary criticism			The main trends and directions of literary criticism is a comprehensive analysis of the actual problems of literary criticism, interpretation of monographs, scientific articles published in recent years, a summary of significant works, explain the main ideas that reflect the literary direction, mutual comparisons, the identification of relevant problems, the search for new research methods and techniques.	Problem-based learning, discussion	OP 1 OP 3 OP 4 OP 6	Written
4	PT 703 Интенсивные курсы	БП ЖК	12				
5	MSP 704 Anthropocentric paradigm in linguistics	UC	6	The purpose of the discipline is to provide independent search and research by doctoral students within the framework of the language system and the anthropocentric idea of language. Modern linguistics from the point of view of scientific paradigms. Poly paradigm studies. The essence of the anthropocentric	Dialog training, comparative analysis	OP 5 OP 7	Written

				paradigm. The anthropocentric paradigm in modern linguistics and the concepts that make up the categorical apparatus of this scientific discipline. Four directions of the anthropocentric paradigm.			
6	MSP 705/1 A. Quantitative and qualitative analyses in scientific research//	OC	5	A student in this discipline fully masters the types of quantitative and qualitative research methods. Data collection methods; ethics of data collection; in-depth interview, semi-official interview, expert interview, focus group discussions, observations, experiments; use and distinction of quantitative and qualitative research methods in scientific research; case study in qualitative research; quantitative research methods; working with the Jamovi, SPSS application; T-test, correlation, topics of descriptive analysis, regression, linear regression, factor analysis, ANOVA, pareto analysis, etc. are included.	Information Technology	OP 5 OP 7 OP 8	Written
	MSP 705/2 B. Problems of periodizing the history of literature			The aim of the course is to create the competences of doctoral students to provide scientific research in the field of the problems of periodization of the history of literature. Scientific principles and criteria for periodizing the history of literature. Geographical, historical, comparative-historical analytical methods. Heterogeneous, historical-civil, chronological principles. Genre pricipas. Periodization by directions and currents	Problematic, critical thinking	OP 3 OP 4 OP 6	Oral

PT - 3 Professional training <i>Module description:</i>							
№	Name of subject and code	Cycle/co mponent	Credits	Subject discription	Teaching methods	LO by EP	Assessment methods

1	PT 7(8)01 Pedagogical practice	UC	10		Doctoral students strengthen their pedagogical skills in practice, organize educational processes with bachelors and undergraduates.	Educational process	-	Report
2	PT 7(8)02 Research practice	UC	10		Doctoral students strengthen their pedagogical skills in practice, organize educational processes with bachelors and undergraduates.	Experimental work	-	Report
3	PT 703 Doctoral student research work, including internship and doctoral dissertation DSRW	DSRW	14	16	In accordance with the individual work plan, he passes a scientific internship in research institutions. The internship program is organized depending on the scientific direction of the doctoral student. Work is underway to create a bibliographic, scientific apparatus on the topic of the study.	Experimental work	-	Report
	PT 703 Methods of scientific research		2					
4	PT 703 Doctoral student research work, including internship and doctoral dissertation DSRW	DSRW	12	14	In accordance with the individual work plan, he passes a scientific internship in research institutions or organizations in the relevant fields of activity. The internship program is organized depending on the scientific direction of the doctoral student. The doctoral student works on scientific papers and determines the methodology of research work.	Experimental work	-	Report
	PT 703 Intensive courses		2					
5	PT 803 Doctoral student research work, including internship and doctoral dissertation DSRW	DSRW	20		During the scientific internship, consultations are held on the methodology of writing articles in scientific publications included in the database of the KKSON, Thomson Reuters, Web of Science, Scopus.	Experimental work	-	Report
6	PT 803 Doctoral student research work, including internship and doctoral dissertation DSRW	DSRW	25		Selects and applies methods and techniques of scientific research. As part of the research work, the doctoral student presents the results of research in scientific journals and at international, national conferences, etc. and can reflect them in the journals of the CCSON.	Experimental work	-	Report
7	PT 903 Doctoral student research work, including internship and doctoral dissertation DSRW	DSRW	30		Conducts experiments as part of research work. Presents the research results to SCOPUS-based journals. Analyzes the main conclusions and novelties of the research work.	Experimental work	-	Report

8	PT 903 Doctoral student research work, including internship and doctoral dissertation DSRW	DSRW	18	As part of the research work, the doctoral student submits a report to a scientific seminar. Publishes articles in SCOPUS-based journals. Analyzes the theoretical and practical significance of the research work.	Experimental work	-	Report
9	FE Final Certification	FE	12	Writing and defense a doctoral dissertation	Preparation and defense of a dissertation	-	Defense
